

FIG. 1A

FIG. 1B is a schematic diagram of a network system. The system includes a central cloud network (2) connected to four servers (4, 8, 10, 12) and a laptop (6). The servers are labeled A, B, C, and D. Each server has a top section (10) and a bottom section (12). The top section (10) contains a network interface (14) and a storage unit (16). The bottom section (12) contains a processor (14) and a memory unit (16). The cloud network (2) is connected to the top sections (10) of all four servers. The laptop (6) is connected to the top section (10) of server C.
